Pressure Sensors Calibration

Pressure Sensor 1

1. Ensure there is zero pressure at the sensor to be calibrated.
2. Enable the sections to spray.
3. Press the Calibration button for the desired type of calibration to begin test and set zero point.

WARNING

Running this test will discharge liquid from the nozzles.

To avoid injury from exposure to chemicals, use clean water and appropriate personal protective equipment.

If necessary, use the master switch to stop application.
