

How to change the Record Stop Height on an S Series Combine

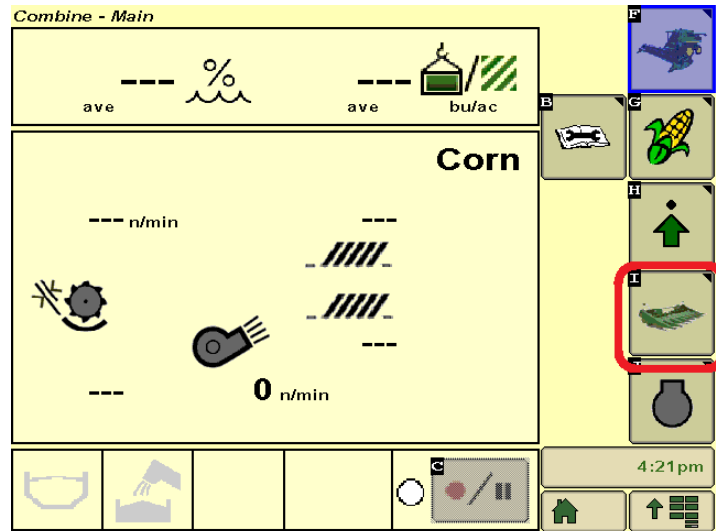

1. Press Main Menu Button.

2. Press "Combine" Button.

3. Press the Header Button (Letter I).

4. Use the feederhouse height/tilt button to position header at least 1 foot above harvesting height.

5. When header is at desired elevation press the Record Stop Height Button to record the current feederhouse height. The percentage will change after the Record Stop Height Button is pressed.
